

I am an academic involved in teaching and active research in the field of Food Sciences and Nutrition with over 20 years experience. I have worked my way up from joining UNSW as a tutor to a Professorial position. My research areas are in the field of water soluble vitamins in Human Nutrition: quantification in foods and absorption in humans from natural and fortified sources with substantial research publications in the field. I have served on Government level Committees as an advisor for fortification of foods in Australia more recently on the Folate Technical Advisory Group and the Steering Committee on Food Composition in Australia for the Food Standards Australia and New Zealand (FSANZ).

My research has been funded extensively by the Australian Government (Rural sector) and has been a collaborator on projects funded by the EU. I have substantial experience in establishing and managing University and Industry collaboration in the field of Food Sciences. I have a significant track record in co-ordinating and advising both Postgraduate (Local and International) research and Coursework students within the University.
