

**Name:**

**Pritam**

**Singh**

**From 1969 to 1976 worked as a high school teacher and university lecturer in Fiji. Except for a break of one year (1980), when I worked as a lecturer in Chemistry at the University of West Indies, Jamaica, I have been working as an academic at Murdoch University since 1976. Currently I hold the position of Emeritus Professor at Murdoch University. As an academic, I have always maintained strong research collaboration links with Indian Universities and research organizations such as CSIR, India. Through these links, under funding from AusAID and other Australian funding sources, over the years, I successfully lead several prestigious research collaboration projects. These include "Arsenic mitigation from ground drinking water in India/Bangladesh and a nanotechnology based project under the Australia/India strategic research collaboration program. My main research areas are: energy storage batteries, applied electrochemistry, hydrometallurgy and water treatment.**
