Name: Dr.   Rajiv   Ranjan

Introduce yourself in a brief paragraph:

Dr. Ranjan has a PhD in Computer Science and Software Engineering from the University of Melbourne, 2009. He completed Bachelor of Computer Engineering from North Gujarat University, India, in 2002. That year, he was ranked first in the department of computer engineering of the University with G.P.A of 3.97 on scale of 4.0. After submitting his PhD thesis, Dr. Ranjan held full-time research-only positions at the University of Melbourne and University of New South Wales.

Dr. Ranjan succeeded in securing an International Postgraduate Research Scholarship and Melbourne International Research Scholarship for pursuing PhD study at the University of Melbourne; and three IEEE Technical Committee on Scalable Computing (TCSC) travel scholarship awards to present papers at 2005 IEEE International Conference on Cluster Computing, 2006 IEEE International Conference on Cluster Computing, and, 2007 IEEE International Conference on eScience and Grid computing. He received several travel grants from the Graduate School and Department of Computer Science and Software Engineering at the University of Melbourne. He won the "Outstanding Paper on New Communications Topic Award for 2009" conferred by the IEEE Communications Society.
