

Name:

Amit

Rudra

Introduce yourself in a brief paragraph:

My specialization is in the area of Information Systems/ Information Technology with specialization in the field of database, data mining and data warehousing. After working in India for several years in the system software development for export, I joined Curtin University, Perth as an academic - teaching and researching in the area of database and related fields. Currently, I am also involved in the area of ERP systems – both teaching and researching the collaborative educational aspects of the same. My research studies are in the area of parallel and efficient processing of data warehousing and data mining queries using sampling techniques
