

Dr. Sachdev is Scientia Professor of Neuropsychiatry at the University of New South Wales and Clinical Director of the Neuropsychiatric Institute www.med.unsw.edu.au/npi , the Prince of Wales Hospital in Sydney, Australia. He graduated from the All-India Institute of Medical Sciences, New Delhi in 1978 and completed his MD in Psychiatry in 1983 in that institution before migrating to New Zealand and then to Australia where he completed his psychiatric training and PhD (1991) and went on to head the Neuropsychiatric Institute. His doctorate was on the ethnopsychological concepts in Maori culture. His early work in Neuropsychiatry was on drug-induced movement disorders, in particular akathisia, tardive dyskinesia and neuroleptic malignant syndrome. His most recent work has been in dementia and pre-dementia syndromes, in particular relating to neuroimaging, neuropsychology, biomarkers and risk factors. He has extensively examined the outcome of psychosurgery, and is currently involved in examining brain stimulation techniques (TMS, DCS and VNS) for psychiatric disorders. Dr. Sachdev is past-president of the International Neuropsychiatric Association and inaugural Chair of the Section of Neuropsychiatry of the Royal Australian and New Zealand College of Psychiatrists. He has published five books and over 250 original papers in peer-reviewed journals. His most recent books are 'The Yipping Tiger and other tales from the neuropsychiatric clinic' and 'Secondary Schizophrenia'. He currently holds, as Principal Investigator, a National Health & Medical Research Council Program Grant, an Ageing Well Ageing Productively Program Grant and a NHMRC Capacity Building Grant in addition to many other grants. He heads the Brain and Ageing Research Program of the University of New South Wales.
